EMPLOYMENT

Dew Solutions Pvt. Ltd., *Software Engineer*, Gurugram Apr. 2020 - Current

- Implemented new features using Angular for **CENTRL** - a platform for Privacy Management and Third-Party Risk.

Mindler Education Private Limited, *Front-End Developer*, New Delhi Aug. 2019 - Apr. 2020

- Single-handedly developed from scratch the front-end of a dynamic ed-tech product, **Partner Platform**, using Angular 8 and Bootstrap 4.
- Responsible for all the front-end related tasks of the existing product.
- Developed campaign pages for marketing using HTML and CSS.

Infosys Limited, *Systems Engineer*, Pune, Maharashtra Sept. 2018 - Aug. 2019

- Worked on **Splunk** to create dashboards for real time monitoring and **Ibis Adapter Framework**.

Systems Engineer Trainee, Mysore, Karnataka May 2018 - Aug. 2018

- Training in J2EE to develop Enterprise Application using Java, Hibernate and AngularJS.

PROJECTS

CENTRL

- Developed new components and modules using Angular as per client requirements for the application.
- Responsible for maintaining and enhancing the existing code which also included working on AngularJS pages as it is a hybrid application.
- Implemented new features like primeNG library for UI, Internationalization and File handling with S3.

Partner Platform

A web application that acts as a SaaS platform for the career counselling process.

- Works on a subscription model.
- The application has various models like — Website customization, Organization Management, Student Management, Career Planning Tools, Billing and Purchase.
- The app also includes many server-side bits including JWT authentication, permissions, and charging credit cards.

Splunk - Real-time Monitoring

- Analysed the logs and then created dashboards that represents the errors in application chain i.e. TIBCO components and Ibis, shows queues status, main frame transfer jobs status, etc.

Ibis Development - Insurance

- Used Ibis Adapter Framework which allows (transactional) messages to be modified and exchanged between different systems. It deals with XML & XSLTs.
- Handled issues on production instances.
